SECTION 3 - HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW: WARNING! Contents under pressure. May cause eye, skin, nose and throat irritation. May cause skin and lung sensitization. Harmful if inhaled. Exposure to temperatures above 120 degrees F. may cause can to rupture.

POTENTIAL HEALTH EFFECTS:

EFFECTS OF OVEREXPOSURE - EYE CONTACT: May cause eye irritation. Foam contact can cause physical damage due to adhesive character.

EFFECTS OF OVEREXPOSURE - SKIN CONTACT: May cause allergic reaction or irritate skin. Effects may be permanent. Prolonged or repeated contact may lead to sensitization and dermatitis(rash). The foam has strong adhesive characteristics and will adhere aggressively to skin and other surfaces. If accidental foam contact occurs, follow the appropriate first aid procedure described in section 4 of this MSDS.

EFFECTS OF OVEREXPOSURE - INHALATION: Vapor harmful if inhaled. Vapor may cause nose and throat irritation with tightness in the chest, coughing or allergic asthma-like sensitivity. May cause asthma and/or sensitization. Effects may be permanent. Extensive over-exposure can lead to respiratory symptoms like bronchitis and pulmonary edema.

Overexposure to fluorocarbon may affect the brain or nervous system causing dizziness, headache, nausea, light-headedness or lethargy. Persons with cardiac arrhythmia may be at increased risk in severe exposure.

EFFECTS OF OVEREXPOSURE - INGESTION: This material may be harmful or fatal if swallowed. If ingested, this product may cause vomiting, diarrhea, and depressed respiration. May cause irritation of mucous membranes in the mouth and digestive tract.

EFFECTS OF OVEREXPOSURE - CHRONIC HAZARDS: Reports have associated permanent brain and nervous system damage with prolonged and repeated occupational overexposure to solvents.

MEDICAL CONDITIONS WHICH MAY BE AGGRAVATED BY CONTACT: INDIVIDUALS WITH LUNG OR BREATHING PROBLEMS SUCH AS ASTHMA OR PRIOR REACTION TO ISOCYANATES MUST NOT BE EXPOSED TO VAPOR OR SPRAY MISTS.

PRIMARY ROUTE(S) OF ENTRY: SKIN CONTACT INHALATION

SECTION 4 - FIRST AID MEASURES

EYE CONTACT: Flush with large quantities of water for at least 15 minutes or until irritation subsides. Contact a physician immediately.

SKIN CONTACT: Remove contaminated clothing. DO NOT use acetone or other solvents to remove product from skin. Wipe excess uncured foam off with a paper towel or rag immediately. Wash remaining uncured foam immediately with warm soapy water. Remaining uncured foam can be removed with petroleum jelly or baby oil. Cured foam may be physically removed by persistent washing with soap and water. Then apply petroleum jelly. If irritation develops, use a mild skin cream and contact a physician immediately.

(Continued on Page 3)

SECTION 4 - FIRST AID MEASURES

INHALATION: Remove to fresh air. If breathing is difficult contact a physician immediately. If breathing has stopped, administer artificial respiration. Provide oxygen or artificial respiration by trained personnel.

INGESTION: DO NOT INDUCE VOMITING. Drink 1-2 glasses of water or milk. Do not give anything orally to an unconscious person. Contact a physician or Regional Poison Control Center immediately.

COMMENTS: None.

SECTION 5 - FIRE FIGHTING MEASURES

FLASH POINT: 800 F.

LOWER EXPLOSIVE LIMIT: N.E.

UPPER EXPLOSIVE LIMIT: N.E.

AUTOIGNITION TEMPERATURE: N.E.

EXTINGUISHING MEDIA: CO2 DRY CHEMICAL FOAM WATER FOG

UNUSUAL FIRE AND EXPLOSION HAZARDS: Containers may explode if exposed to extreme heat. Eliminate sources of ignition: heat, electrical equipment, sparks, and flames. Do not put in contact with oxidizing or caustic materials.

SPECIAL FIREFIGHTING PROCEDURES: Full protective equipment, including self-contained breathing apparatus, is recommended to protect from combustion products. Cool exposed containers with water.

SECTION 6 - ACCIDENTAL RELEASE MEASURES

SPILL OR LEAK PROCEDURES: Use absorbent material or scrape up dried material and place into containers. Uncured foam is very sticky, so carefully remove the bulk of the foam by scrapping it up and the immediately remove residue with a rag and solvent such as mineral spirits, acetone (finger nail polish remover), paint thinner, etc.. Once the foam has cured it can only be removed physically by scraping and buffing.

SECTION 7 - HANDLING AND STORAGE

HANDLING INFORMATION: KEEP OUT OF REACH OF CHILDREN. Do not get on eyes, skin or clothing. Do not breathe vapors. Use only in a well ventilated area. Make sure nozzle is directed away from yourself prior to discharge. Do not puncture or incinerate (burn) can. Do not place in hot water or near radiators, stoves or other heat sources. Do not keep can in direct sunlight or high temperature areas such as automobiles. If exposed to heat or direct sunlight, container may explode.

STORAGE INFORMATION: Store away from caustics and oxidizers. Keep away from heat, spark, and flame. Keep containers tightly closed when not in use. Keep containers from excessive heat and freezing. Do not store at temperatures above 120 degrees F. Store in a cool dry place.

(Continued on Page 4)

SECTION 7 - HANDLING AND STORAGE

This product is combustible and may constitute a fire hazard if improperly used. DO NOT USE NEAR OPEN FLAME. Cured foam may be combustible if exposed to flame or temperatures above 240 °F.

OTHER PRECAUTIONS: Intentional misuse by deliberately concentrating inhaling vapors may be harmful or fatal. Do not take internally.

SECTION 8 - EXPOSURE CONTROLS/PERSONAL PROTECTION

ENGINEERING CONTROLS: Prevent build up of vapors by opening all windows and doors or use other means to ensure cross ventilation and fresh air exchange during application and drying. Provide sufficient mechanical ventilation (local or general exhaust) to maintain exposure below PEL and TLV. Vapors are heavier than air and will collect in low areas. Check all low areas (basements, sumps, etc.) for vapors before entering.

RESPIRATORY PROTECTION: If 8 hour exposure limit or value is exceeded for any component, use a NIOSH-approved positive pressure, supplied air respirator. Consult your safety equipment supplier and the OSHA regulation, 29 CFR 1910.134 for respirator requirements. A respiratory protection program that meets OSHA 1910.134 and ANSI Z88.2 requirements must be followed whenever workplace conditions warrant a respirator's use.

If sanded, wear a NIOSH approved dust mask.

EYE PROTECTION: Goggles or safety glasses with side shields.

SKIN PROTECTION: Impervious gloves and long sleeve work clothes.

OTHER PROTECTIVE EQUIPMENT: None.

HYGIENIC PRACTICES: Discard contaminated clothing.
